“ Another kind of definition is that **design is a system** of relationships between all of the aspects of the problem, which means the relationship between you and the piece of canvas, you and the eraser, you and the pen. The relationship between the elements proportions, which mean the relationship of sizes. I can go on all day. *Paul Rand*

Sol Lewitt - Instructions for making art

“ In conceptual art the idea or concept is the most important aspect of the work. When an artist uses a conceptual form of art, it means that all of the planning and decisions are made beforehand and the execution is a perfunctory affair. The idea becomes a machine that makes the art. *Sol LeWitt*

Gordon Pasque - Colloquy of Mobiles

1. [Catalogue](#)
2. [Critique](#)

“ Exemplary for the appeal of the great promises made early in the computer age, Cybernetic Serendipity epitomizes the dilemma much of media art faces today: its complicated relationship with the socio-economic environment, the difficulty of engaging with its own historicity and transcending mere techno-fetishism, and the all-too-familiar sense of a naïve, unbridled optimism with its inevitable pitfalls and false dawns. [link](#)

The utilization of scientific know-how, however, did not simply lead to a revalorization of the art object and the materials that could be made of it. On the contrary, the integration of technology engendered a growing interest that went beyond a strictly object-oriented approach toward practices that focus on process, ideas and (inter-) actions. Concomitant with experiments in participation and interaction, with happenings, performances, land art and conceptual art, media art is often regarded as a conclusion of the dematerialization of the art object.
