How to borrow components from CTH?

1. Please discuss which components you would like to use with the technicians. We will assist you with checking out and collecting the components at the WG14 Creative Technology Hub.
2. When collecting the components, kindly provide the **component numbers** to help expedite the checkout process.
3. Please note that all components are subject to **availability**. Additionally, ensure that you take good care of the components during use.
4. **No Soldering is allowed on any of our components.** If any components need to be soldered, please consult a technician beforehand.
5. If the component number starts with **E**, it means the component is located in the electronics components drawer in the main lab area and they don't need to be booked and checked out. However, please be reasonable and responsible for the amount of components you take.
