

Setting up Spark AR

Setting Up Spark AR

- On your laptop go to <https://sparkar.facebook.com/ar-studio/> (you do not need a facebook account to download)

The screenshot shows the Spark AR website interface. At the top, there is a navigation bar with the Spark AR logo on the left, followed by links for 'Features', 'Inspiration', 'Learn', and 'Blog'. On the right side of the navigation bar, there is a 'Manage Effects' link and a prominent red 'Download' button. Below the navigation bar, a large banner features the text 'SPARK AR UPDATES' in blue, followed by 'Brand new features. All-new possibilities.' in large black font. A sub-headline reads: 'Our latest update simplifies the creation of AR effects — and our new capabilities open up fresh AR experiences on Instagram.' Below this text is a 'Read More' button. The background of the banner is a landscape with a white horse on the left, a brown horse in the middle, and a stylized red tree on the right. A white play button icon is overlaid on the landscape.

- Follow the instructions to Install Spark AR
- You will also need to install Spark AR player on your mobile device in order to view your AR project
- Go to the App store and search for Spark AR Player, download
- You are now ready to make your first project
